

As a truck driver i need instant traffic/weather off of xm radio for my route it help's me save fuel and frustration of traffic jams. Try doing stop and go traffic 4 time's a day and you will know Why this is NEEDED!!!! i can NOT wait for the morning new's to get to the traffic and wade through the dribble and crap before they finely get to it and i'm all ready in the jam up on the road.. it is better to know where it is before you get to it, and be stuck wasting time, fuel and money. XM radio has provided a very valuble service to me by providing this option to its programing as it is there WHEN you NEED IT. before your in the mess.

Thanks for your time.

Steven Foss.
